

In Short:

I have been teaching at CAHS since September 2004, for which I am grateful. I teach engineering (PLTW) and mathematics (I am also certified to teach German).

Some Personal Information

I have traveled to more than twenty foreign countries and have worked (teaching English in South Korea and Germany) and studied (German language and literature at the University of Munich for my junior year of college) for longer than three years. Most recently, I taught for three weeks during two summers in Voronezh, Russia. I have also worked in the auto body and mechanical design fields for more than ten years. My most recent design position was as a mechanical designer with a firm that designed radio frequency filters for cellular phone towers.

Family

My wife and I (34 years!) have four children: a 27-year-old girl (an occupational therapist), a 25-year-old boy (electrical engineer and Army National Guard soldier), a 24-year-old boy (a real estate investor), and a 21-year-old boy (a real estate investor and guitar luthier). **We enjoy serving at church, camping, reading, traveling, playing musical instruments, and spending time with friends and family.**

Spare Time

The remainder of my time is spent with my family, reading, playing in the church band, serving at church, assisting jail and prison inmates and parolees, and just having a good time ☺.

Secondary Certification

Vocational Technology: Drafting & Design

Mathematics

German (Deutsch)

Academic Degrees

A.A.S. Auto Body Design

B.A. Mathematics

B.A. German (Junior Year at the University of Munich)

M.A. English

M.A. Religion (M.A.R.)

M.A. Teaching (9 credits remaining)
